

Hands-Free™ Flush System

Automatic Solutions for a Maximum Level of Hygiene in Restrooms

Dependable Operation

- Keeps fixtures flushed and presentable
- Sophisticated sensor technology
- Trouble-free operation using cam gears

Cost Effective

- No need to replace plumbing fittings

Easy to Install

- No plumbers needed
- No water shutoff
- Batteries and tools are included

ADA Compliant

Pro-Link's Hands-Free Flush System

delivers automatic, no-touch flushing for improved hygiene and appearance in restrooms. Upgrading your facility is easy and cost-effective – simply add Pro-Link's Hands-Free Flush System to your existing fixtures. These automatic solutions eliminate the need for costly restroom upgrades.

The sophisticated sensor manages flushing automation like no other system today. The angled lens design combined with sophisticated sensor technology guarantees activation – every time even with the toilet seat raised. The Sensor Range Adjustment allows you to set a sensor range of 8" to 48." Keeps fixtures flushed and presentable.

Programmable options include the 24-hour flush option and the battery replacement tone option. With the 24-hour flush option, fixtures are flushed at least once every 24 hours, preventing sewer gases from escaping through a dry trap. Batteries provide up to 100,000 flushes and the programmable battery replacement tone signals when to change batteries.

Many touch free flushing systems are solenoid operated which fail, leaving non-operating fixtures. Pro-Link's Hands-Free Flush System uses cam gears for dependable and trouble-free operation. All electronics remain separate from water.

The Hands-Free Flush System provides the ultimate washroom experience, while ensuring good hygiene for patrons and occupants of your facility.

Hands-Free™ Flush System

For urinal or toilet installations to replace existing flush handle

The Hands-Free Sidemount is the perfect solution for automating fixtures in high traffic restrooms. Simply remove your existing flush handle with the supplied wrench, replace with your new Hands-Free unit, and tighten the collar nut with the same wrench. Insert supplied batteries, and the conversion is complete – in two minutes. No water shut-off is required and no plumber is needed. The Hands-Free Flush is available in chrome.

For urinal or toilet installations to fit over existing flush handle

The Hands-Free Clamp is the easiest and most cost-effective way to gain the benefits of an automatic flushing system. Simply slide the Hands-Free Clamp on the existing handle and secure the mounting clamp (two screws). Insert the batteries, replace the Hands-Free Clamp cover and the conversion is complete – in one minute. No water shut-off is required and no plumber is needed. The Hands-Free Clamp is available in chrome.

For your toilet – easy wireless installation with existing flush handle

The Hands-Free Tank is the proven way to ensure toilets are always flushed and presentable. Simply mount the motor in the tank, install the sensor and insert batteries.

Choose from three modes of operation: object detection, object detection with extended delay or wave only. The Hands-Free Tank is available in white.

All Hands-Free Flush units carry a 3 year full warranty and an extended 10 year replacement warranty.
