

# SaniBin System

## A Better Sanitary Waste System

- Improves your facility's image
- Hands free operation
- Clean and hygienic
- Odor control
- Reduced plumbing problems and costs

## Sanitary Waste System

Every day millions of women need to dispose of sanitary waste in a way that is safe, responsible and with minimum harm on the environment. Pro-Link's SaniBin System is designed to meet the needs of today's modern world, providing a safe and hygienic way to dispose of sanitary waste.

Two convenient sizes are available to fit your washroom needs. The 5 gallon SaniBin is made for large washrooms with heavy traffic, such as stadiums, malls and convention centers. The Mini SaniBin is 3 gallons, making it ideal for smaller washrooms with less traffic.

### Designed to protect the user

- Pedal operation limits direct contact
- Deep chute prevents waste adhesion and promotes better hygiene

### Designed to assist the custodial staff

- Contoured body shape is easy to clean
- Smooth body does not harbor dirt or germs

## SaniBin System Deodorant

The SaniBin System Deodorant automatically activates when sanitary waste is placed in the bin, neutralizing odors while providing a fresh fragrance. In addition, its integrated biocide deactivates pathogens and harmful bacteria while keeping them from propagating, ensuring safe storage of soiled material.

Each bottle contains 50 pre-measured doses of 20 grams, which are dispensed by simply inverting the bottle, eliminating the need to measure doses. The large blue granular formulation

prevents dust formation, protecting the custodial staff from inhaling dust. With each dose keeping bins fresh for up to eight weeks, the SaniBin System Deodorant saves costs on servicing.

## Five good reasons to use Pro-Link's SaniBin System

- Keeps washrooms, clean, safe and sanitary
- Smooth surface is easy to keep clean and dirt-free
- Slim design – easy to fit into washroom stalls
- Touch-free pedal operation minimizes direct contact
- Biocide ensures safe storage of waste and keeps bins fresh between services
