

# SaniClean System™

Continuous Fixture Cleaning and Drain Maintenance System

- Enhances Cleanliness and Washroom Image  
24 Hours a Day
- Easy Installation
- Environmentally Friendly
- World-Class Reliability

# SaniClean System™

The SaniClean System is a super concentrated fixture cleaner and dispenser for sparkling clean tank toilets. Concentrated refill formulas attack and eliminate odors at the source, cleaning fixture surfaces and maintaining drains continuously.

## Enhances Cleanliness and Washroom Image 24 Hours a Day

Uniquely designed to dramatically improve the overall cleanliness and image of any washroom. Concentrated formulas eliminate the breeding ground of bacteria and odors at the source.

Fuel cell technology delivers consistent metered dosing of concentrated refill formula which prevents build up of uric scale on pipes and hard water deposits on fixture surfaces. The SaniClean dispenser uses pre-programmed “smart-chips” to manage the life of the refill. Use the Blue 30-day chip for high traffic areas or the Green 60-day chip for lesser traffic areas. “Smart-chips” are easily inserted into the dispenser at installation.

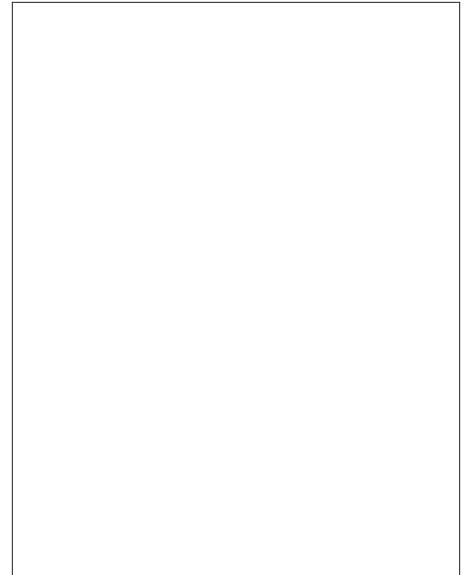

## Easy Installation

Discreetly installs inside tank toilets and continuously cleans. No plumbers needed.

Inserting a refill is easy – simply push and twist to secure. The latching cover ensures the SaniClean refill stays in place. Delivery tube clips onto the overflow tube delivering concentrated formula to those hard to reach areas, such as rim holes.

## Environmentally Friendly

Dispenser and Refill components are recyclable. System does not require batteries. SaniClean concentrated refills extend time between cleanings and reduce or eliminate the amount of chemicals added to the waste stream.

## World-Class Reliability

Has no moving parts to repair or replace. Operates 24 hours a day. Comes with a lifetime warranty.
